

## NoviFlow™ Short Rail Mounting Kit for NS2000 Series (48.26 cm to 67.56 cm)

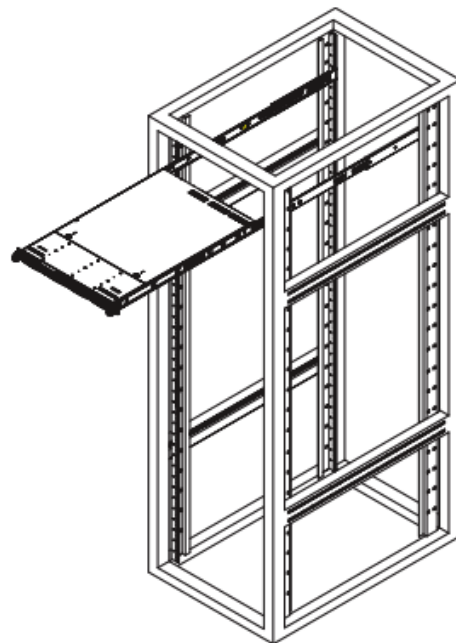

NoviFlow's **Series 2000 NovSwitch Rail Mounting Kits** are designed to provide optimal installation of series 2000 NovSwitches™ in industry standard 19" racks.

The sliding rails provide a robust and secure mechanism for mounting NovSwitches, while facilitating access to cabling, fans and modular power supplies at the rear of the NovSwitch chassis.

Each rail is equipped with handles and a locking mechanism to lock against retraction when fully pulled out.

Each Rail Mounting Kit includes both left and right rails. Each rail is composed of two parts:

- an inner rail designed to be quickly installed on the side of the NovSwitch's chassis, and
- an outer rail which mounts on the 19" (48.26 cm) rack.

NoviSwitch rail kits have been fully tested and validated to ensure the best quality.

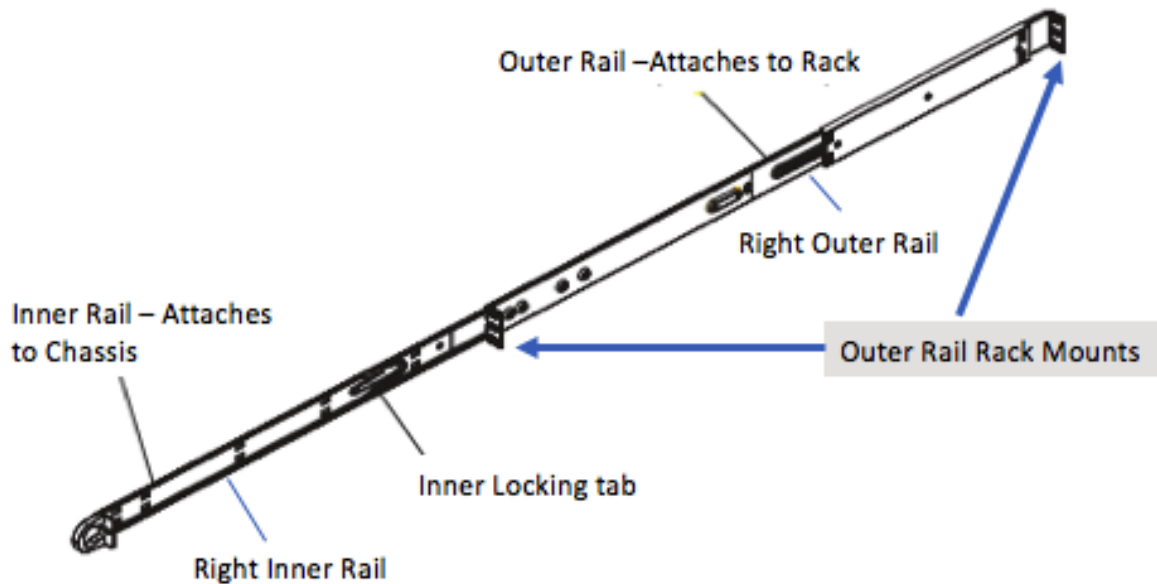

The **Series 2000 NovSwitch Short Rail Mounting Kit** is designed for use with standard 19" racks with a depth of 48.26 centimeters (19 inches) to 67.56 centimeters (26.6 inches).

### Detailed Specification

OUTER RAIL EXTENDABLE LENGTH	48.26 cm to 67.56 cm (19.0" to 26.6")
APPLICABILITY	All variants of NoviFlow NS-2116, NS-2122, NS-2128, NS-2150, NS-21100 NoviSwitches
DESIGNED FOR	1U and 2U
MECHANISM	Linear Friction Rail

### Ordering Information (Part Number):

- 401-000-602: NS2000 Series Short Rail Mounting Kit (48.26 cm to 67.56 cm)

NoviFlow's products uniquely bring together Open Systems, Network Virtualization and fully Programmable Network Logic. Our flexible platform design makes it possible for us to customize our solutions to our customers' specific network needs, whether they run a commercial Data Center, are Network Service Providers, or are building innovative SDN applications.
